NUCLEAR SCIENCE ABSTRACTS

A semimonthly publication of the USERDA Office of Public Affairs
Published by the ERDA Technical Information Center

Nuclear Science Abstracts provides the only comprehensive abstracting and indexing coverage of the international nuclear science literature. It covers scientific and technical reports of the U. S. Energy Research and Development Administration and its contractors, other U. S. Government agencies, other governments, universities, and industrial and research organizations. In addition, books, conference proceedings, individual conference papers, patents, and journal literature on a worldwide basis are abstracted and indexed. Each issue of *Nuclear Science Abstracts* includes four indexes: subject, personal author, corporate author, and report number.

The following organizations scan and abstract the nuclear science literature in their respective countries for input to the International Nuclear Information System of the International Atomic Energy Agency. By special agreement, the input to INIS is simultaneously sent to the ERDA Technical Information Center to enhance the timeliness of coverage of that literature in *Nuclear Science Abstracts*.

Atomic Energy of Canada Limited
Australian Atomic Energy Commission
Danish Atomic Energy Commission
Finnish Atomic Energy Commission
French Atomic Energy Commission
Japan Atomic Energy Bureau–Atomic Energy Research Institute
Commissie Nucleaire Informatieverzorging (Netherlands)
Institutt for Atomenergi (Norway)
Aktiebolaget Atomenergi (Sweden)
United Kingdom Atomic Energy Authority
Zentralstelle für Atomkernenergie-Dokumentation (West Germany)

Numerous organizations, societies, and publishers throughout the world provide *Nuclear Science Abstracts* with advance page-proof copy of their publications.

A list of the journals scanned regularly and the abbreviations used appears in the January 15 issue of *Nuclear Science Abstracts* and is supplemented in the July 15 issue. The January 15 issue also describes the scope and arrangement of the subject matter covered in *Nuclear Science Abstracts*. The subject matter covered is also described in TID-4552, *Subject Scope of Nuclear Science Abstracts*, available free from the USERDA Technical Information Center, P. O. Box 62, Oak Ridge, Tennessee 37830. An outline of the subject categories appears in the Contents of each issue.

NOTICE

The publication of *Nuclear Science Abstracts* is planned to be discontinued after Vol. 33, No. 12, dated June 30, 1976. *Atomindex*, published by the International Atomic Energy Agency and a product of the International Nuclear Information System (INIS), will provide essentially identical literature coverage, subject scope, abstracting and indexing with that of *NSA*. For all practical purposes the two journals are identical. The Energy Research and Development Administration, formerly the Atomic Energy Commission, has supported the concept and development of INIS for several years. At this time, it is quite apparent that the decentralized scanning, abstracting and indexing on a country-by-country basis is reliable and successful. Consequently, it is no longer necessary for the United States to bear the entire burden of publishing an abstract journal covering the world's nuclear literature. ERDA will continue to provide coverage of U. S. nuclear literature to INIS.

Atomindex is available on a subscription basis in the United States from UNIPUB, P. O. Box 433, Murray Hill Station, New York, New York 10016, for $150 per year including cumulative indexes. ($110 per year without cumulative indexes.) For others, *Atomindex* is available from the International Atomic Energy Agency, Publications Section, P. O. Box 590, A-1011, Vienna, Austria, at the same price.

ERDA's new journal, *ERDA Energy Research Abstracts (ERA)*, will contain abstracts and indexes to all literature of ERDA origin as well as nonnuclear energy information generated by foreign countries with which ERDA has agreements for cooperation. *ERA* is available to government agencies on the same basis as *NSA* and on an exchange basis to universities, research institutions, industrial firms, and publishers of scientific information.

The public may obtain *ERA* from the Superintendent of Documents, U. S. Government Printing Office, Washington, DC 20402. The annual subscription rate for the 12 regular issues including an annual cumulative index is $119 for domestic subscribers, and $148.75 for foreign subscribers. Individual issues will be priced at $7.40 domestic, and $9.25 foreign. Separate annual index cumulations will cost $30.50 domestic, and $38.15 foreign.

INDEXES TO *NSA*

Comprehensive indexes appear in each issue and are cumulated at the end of each volume. The report number indexes will be cumulated on both a volume and two-volume basis. Multivolume cumulations have been issued as indicated above.

All documents abstracted are indexed by subjects and personal authors. Report literature is indexed also by corporate author and report number. Each of these indexes in every issue is preceded by an introduction explaining in detail the organization of the index and the principles by which it is compiled. The reader is referred to these explanations for information not found in the brief summaries below.

Personal Authors

Each author's name is indexed in the form appearing on the document abstracted, with the exception that given names are reduced to initials:

NUCLEAR SCIENCE ABSTRACTS
CUMULATIVE REPORT NUMBER INDEX

Volumes 29-33

Numbers assigned to reports, conference papers and proceedings, translations, and patents are included in this index. Each item is listed by report number; this is followed by the abstract number and a brief notation regarding public availability. The index entries show which reports are on file in the institutions listed on the backs of the covers (Dep.), which reports have been published in open-literature journals (journal citation), and which reports can be purchased (source and price). Whenever a report is identified by more than one number, the availability is given under the primary number, and a cross reference is given under the secondary report number.

The report number codes apply to ERDA reports unless designated otherwise. Non-ERDA reports are identified by parenthetical notes after the report codes; e.g., (non-ERDA), (UK), (Canada), (France). The note (Misc.) identifies the codes used for both ERDA and non-ERDA Reports. Patents are listed under the heading "PATENTS"; the country of origin and availability are included in parentheses.

A comprehensive list of both ERDA and non-ERDA report codes is contained in the latest revision of TID-85, *Report Number Series Used by the ERDA Technical Information Center in Cataloging Reports.* This information is also included in the Cumulative Report Number Index (issued annually).

Conferences

Numbers assigned to published conference proceedings as well as individual unpublished papers from conferences are included in this index. A CONF number is assigned to the conference if published proceedings are received and also if only a single paper is received. The base number used is year-month-sequence. Thus, the number CONF-730101 indicates that the conference was held in 1973, in January, and that this was the first January 1973 conference so received. This number would be assigned to complete published proceedings. If individual papers are received, the base number is extended to include a paper number, e.g., CONF-730101-1. As additional papers are received, they are assigned consecutive numbers in the series, CONF-730101-1, CONF-730101-2, etc. This numbering system ensures that all papers received from a conference will be associated with that conference in this index.

REPORT NUMBER CODES USED BY THE TECHNICAL INFORMATION CENTER

Helen W. White, Editor

This section includes report codes that have been used by the Technical Information Center in identifying and cataloging reports. The report codes are listed alphabetically and are identified in each case with the appropriate corporate author or agency which has used the code.

Codes are listed according to the following rules: (1) Codes beginning with numbers are ahead of those beginning with letters. (2) Hyphens, spaces between letters or numbers, and periods between numbers are considered as breaks, similar to the spaces between words observed in word-by-word filing. (3) Slashes and parentheses are not considered as breaks. (4) The terminal dash, slash, or period indicates that a sequence number will follow. (5) If a sequence number, year, month, or initials are given in the middle of a series, they are put in parentheses, e.g., CF-(yr.)-(mo.)-;ANL-(initials)-.

All non-ERDA report codes are identified with an asterisk (*), and also with a plus (+), when used as prime numbers.

Only prime ERDA report codes are identified with a plus. Secondary codes have no identifying symbol.

The series GAT followed by a serial number is used to identify formal reports prepared by this agency. Prior to April, 1958, there were two divisions concerned with technical activity--- The Laboratory Division and the Engineering Development Division. Informal reports from these groups were numbered in the GAT-L and GAT-DR series. These groups were combined in the Technical Division and the series GAT-T replaces the GAT-L and GAT-DR series. The GAT-T series starts with GAT-T-501, a continuation of the GAT-L series. GAT-DR series ceased with GAT-DR-300.

*IG- (see CAL-IG-(no)-(letter)

*+IG-
United Kingdom Atomic Energy Authority. Risley, Lancs, England

IG is the common serial prefix for the Industrial Group Reports. The letter following the IG refers to main functional Branch. The letters following the dash indicates the type of report. The letters following the stroke indicate the establishment at which the report was written.

For example:

IGE-AM/C-1

IGE equals Industrial Group, Engineering Branch series

AM equals Analytical Method
/C equals Culcheth Laboratories
1 means first report in the series.

There are three series numbered straight through from number one, i.e., Reports, Memoranda, and Information series identified as:

Information Series-IG-Inf.-Ser.-1,2,3, etc.
Memoranda-Memo-1,2,3, etc.
Reports-IG-Report-1,2,3, etc.

The letters following the serial number represent the Branch and the Establishment which issued the document. They may be disregarded in filing.

Technical Books & Monographs

Energy Research and Development Administration

1976 Catalog

Technical Books and Monographs is a bibliography of books and monographs sponsored by the Energy Research and Development Administration (ERDA) and by the organizations brought together to form ERDA under the Energy Reorganization Act of 1974. Published to help meet the information needs of scientists and engineers working in energy-related fields, this catalog provides access to a large body of knowledge generated by many programs for more than 25 years—programs as diverse as the field of nuclear medicine, the exploration of physical mechanisms at work in the environment, and the varied technologies required to realize the potential of all energy sources.

This bibliography gives for most publications a brief descriptive statement, lists or describes the contents, and indicates the availability. In addition to the books and monographs, recent symposiums published as ERDA project reports and recent and relevant bibliographies appear in separate sections at the end of each subject category. 154 pages. 5½ by 8½ inches.

Available as TID-4582-R11 without charge from
